BY Columbia

THE PREMIER LINE

AUTOMATIC TAPING TOOLS CATALOG

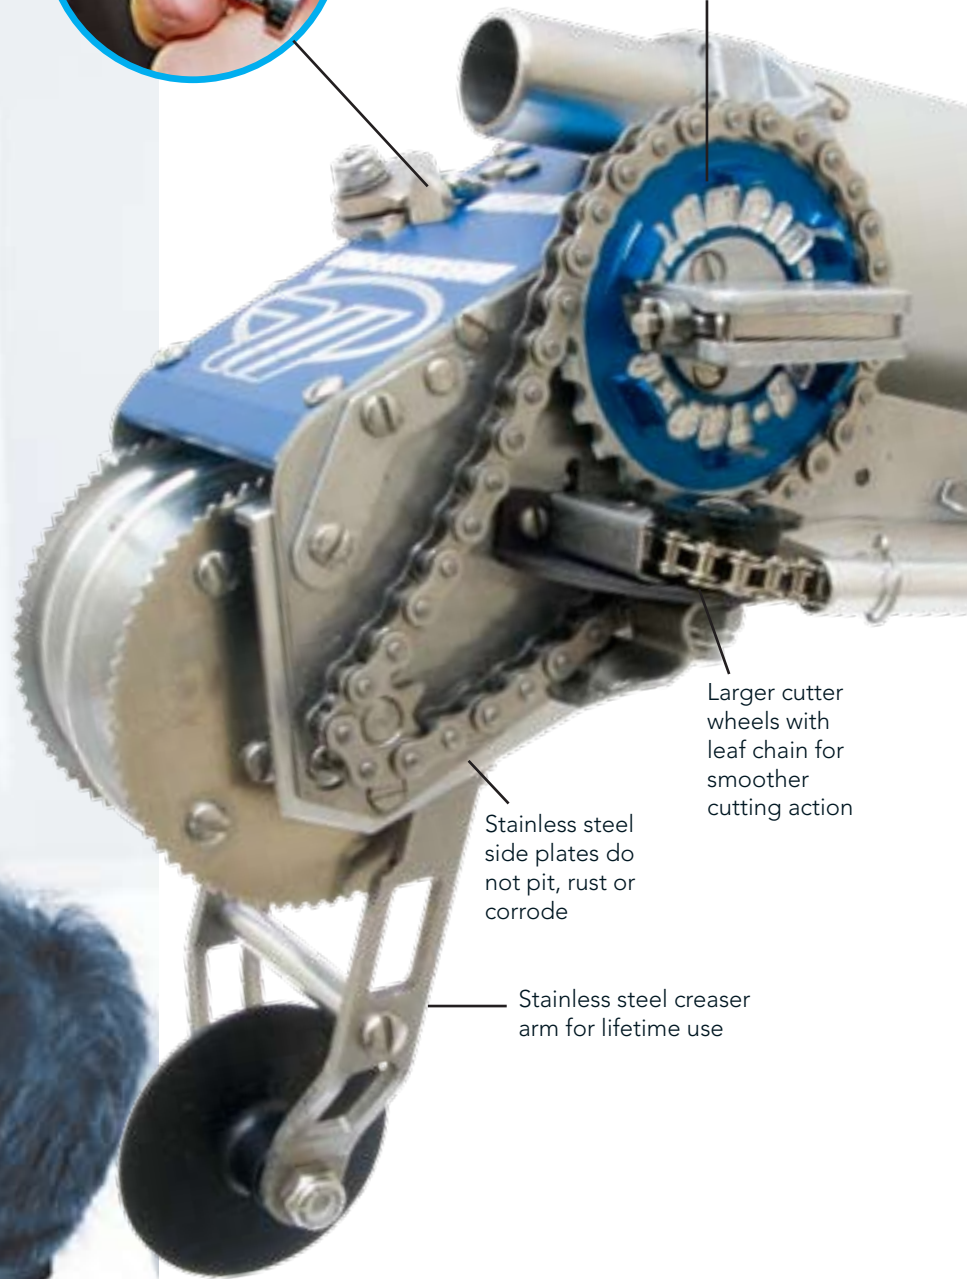

SETTING THE STANDARD OF QUALITY SINCE 1890

The little differences add up
Lighter and stronger, perforated, stainless steel cable drum will not corrode and weld to the shaft like aluminum. You'll never need to use a saw to remove this cable drum!

Billet sprocket is light weight and allows for changing center bushing

Larger cutter wheels with leaf chain for smoother cutting action

Stainless steel side plates do not pit, rust or corrode

Stainless steel creaser arm for lifetime use

Run tape and mud simultaneously over all joints.

12263	MTAPER	Automatic Taper

INNOVATION

The Premier Line of Automatic Taping Tools

Since 1890 Marshalltown Company has been dedicated to setting the standard of quality and producing the premier line of tools in the industry. We pride ourselves on being innovative and providing user-friendly products across our complete line of tools. The Marshalltown by Columbia Automatic Taping Tools are another step in our strides to continue our long standing tradition. The Premier Line of Automatic Taping Tools is here.

Superior engineering, top-notch craftsmanship, and continued attention to detail is confirmed daily by the some of the world's best commercial and residential drywall contractors. Our taper is built to run at peak performance in some of the most demanding environments where abuse and punishment are unavoidable.

Adjustable brake to control wheel tension

Purpose: Simultaneously applies tape and joint compound to horizontal wall joints, ceiling and butt-joints, and internal angle joints.

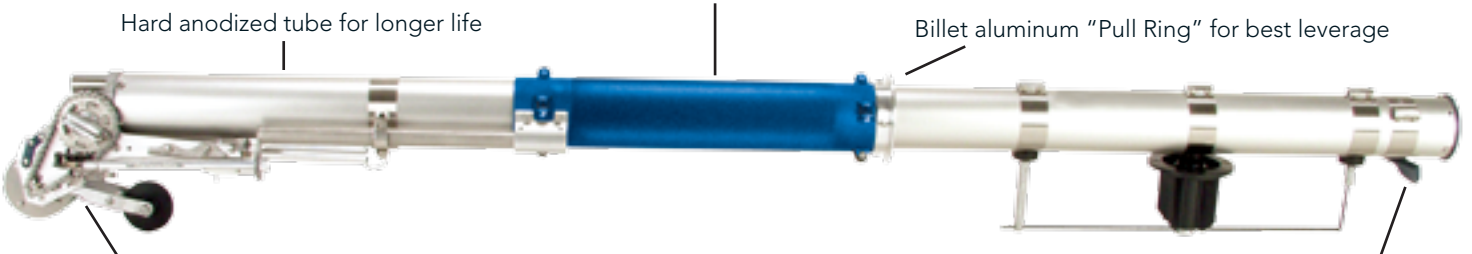

Marshalltown is proud to offer you the finest Automatic Taper in the industry. This precision-engineered tool is designed to be the lightest, fastest, and smoothest running taper available. All this without compromising durability, our taper is manufactured using durable stainless steel and hard anodized aluminum parts giving you years of rugged use.

Knurled sleeve for better grip

Features

- Handy pull ring on hand grip sleeve to let you cut tape with ease while taping high joints
- Exclusive knurled grip sleeve allowing more grip while cutting tape.
- The clutch release shaft and pulley wheel are split to reduce drag while creaser wheel is in use.
- Larger wheels on cutting system to make cutting much smoother.
- Adjustable brake to allow you to control tension on main hub.

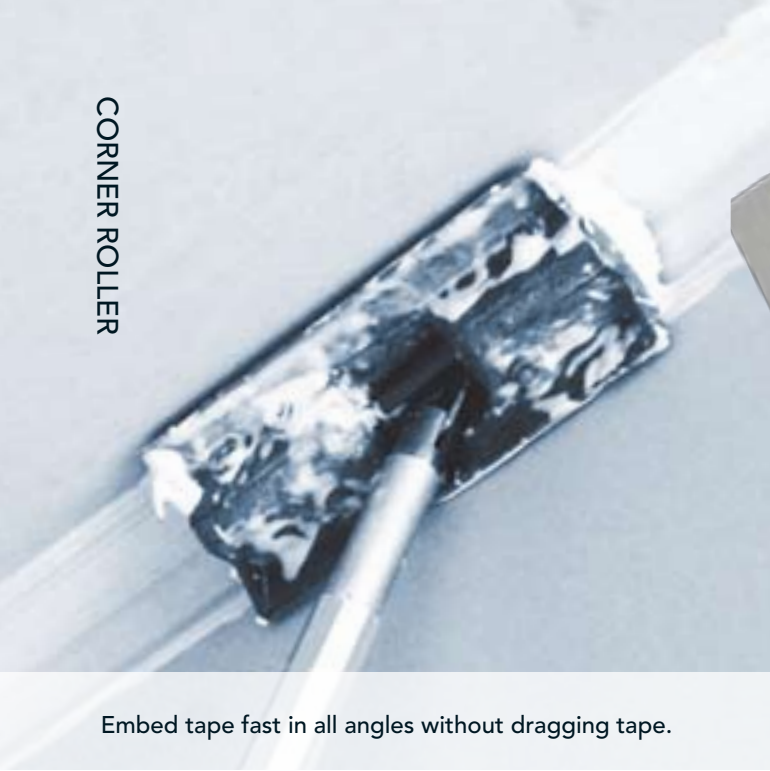

Hard anodized tube for longer life

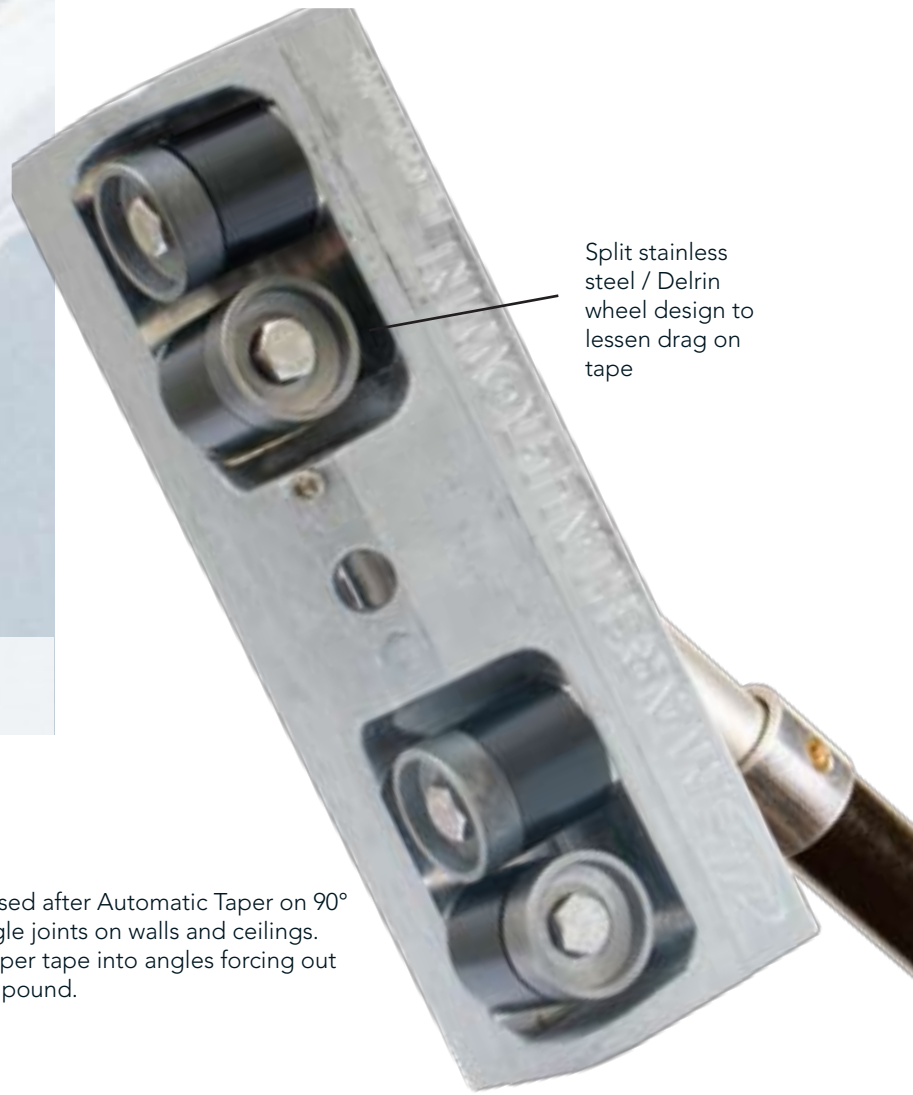

Billet aluminum "Pull Ring" for best leverage

Split clutch design reduces drag in corners. Other tapers use a dual function disc which acts as a brake on the inside of the hollow shaft when creasing, thus creating drag.

Billet aluminum trigger with rubber "o" rings for fingers

Embed tape fast in all angles without dragging tape.

Split stainless steel / Delrin wheel design to lessen drag on tape

Embedding quality

The slickest, most durable roller on the market! Manufactured with a die-cast head, and hardened stainless steel top rollers for long lasting angle work.

Purpose: Used after Automatic Taper on 90° internal angle joints on walls and ceilings. Embeds paper tape into angles forcing out excess compound.

Features

- Combination wheels consisting of hardened stainless steel top and tough Delrin bottom wheels to provide increased durability while decreasing the weight of the tool.
- Pivot head adjusts to angle.

12267	MCREXTL	Corner Roller & Nail Spotter Handle (4-8ft)	48 - 96	1219.2 - 2438.4

QUALITY

Our angle on perfection

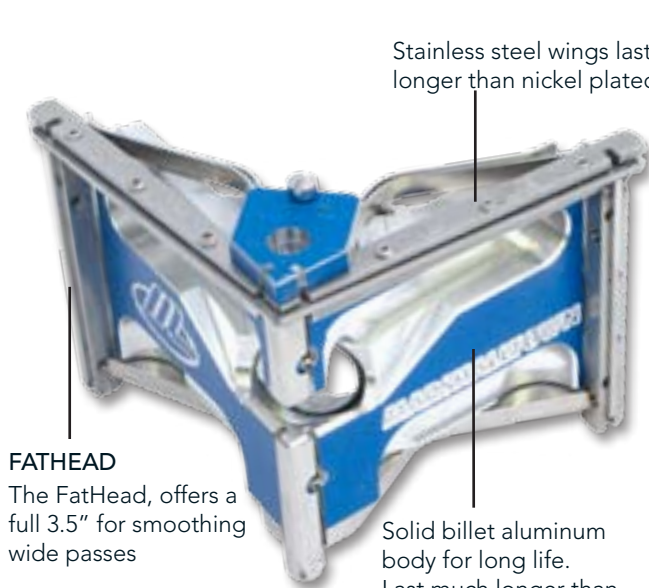

The Marshalltown by Columbia Corner Finishers are the best money can buy! This tool finishes angles professionally with the correct consistent amount of compound and the proper feathering of edges. Precision machined billet aluminum head and durable stainless steel wings ensure longer wear and performance.

Purpose: Used in 90° internal angle joints, after corner roller, to evenly feather compound over tape.

ANGLE HEADS

"Fail Safe" Locking Mechanism locks Angle Head on the ball

FATHEAD
The FatHead, offers a full 3.5" for smoothing wide passes

Stainless steel wings last much longer than nickel plated

Solid billet aluminum body for long life. Last much longer than cast body. Anodized billet body.

Wings are engraved for identification (Left and Right)

MARSHALLTOWN BY Columbia

Thumb release door stop for quick clean

Billet handle mount will not crack under pressure, like cast aluminum. Blue anodized color.

"No-Swell" Gaskets. Use just about any lubricant or solvent without harm.

Hinged door system for quick clean and easy access

Solid stainless steel valve for lifetime usage. Will not leak like other welded thin wall designs.

Solid Engineering.

Purpose: Used in combination with our corner finisher, this tool moves compound through the corner finisher allowing the corner finisher to feather the mud into the internal corner joint.

Specially angled to access tight corners, the stainless steel cone dispenses the proper amount of drywall compound smoothly and evenly.

Includes standard fixed length fiberglass handle. 3'-6' ft. Extendible Handles available.

Durable stainless steel cone design lasts a lifetime. Does not pit and rust through like other designs made from nickel plated mild steel.

Angle Head sold separately.

FLAT FINISHER BOXES

Smooth Operation.

Purpose: "Crowns the Joint" Distributes joint compound evenly in correct amounts over horizontal joints.

The adjustable, stainless-steel blade provides the right amount of compound to finish flat joints evenly and professionally.

Features

"No Swell" gaskets. Rubber-gasketed bar system stays flexible, and rubber roller wheels provide soft ride, even when dirty. The moving axle allows better control.

EDI	Part#	Description	Size-in.	Size-mm
12285	M7FFB	7" Flat Finisher Box	7.0	177.8
12286	M8FFB	8" Flat Finisher Box	8.0	203.2

12288	M12FFB	12" Flat Finisher Box	12.0	304.8

FLAT BOXES

"No Swell" gaskets.

Springs not required!
Hinged door system for quick clean. Run with or without springs.

FAT BOY FLAT BOXES

Holds more mud. Keeps the job flowing

Purpose: "Crowns the Joint" Distributes joint compound evenly in correct amounts over horizontal joints. Able to hold more mud to keep the job flowing, the Fat Boy Flat Boxes are able to hold 40% more compound than standard boxes. Available in 8", 10", and 12" sizes, these boxes will save you many trips to the mud pump.

Features

Free floating brass bar reaches into corners without leaving flags. Handle mounting screws are higher on the box door for an easy push. Extremely durable extruded frame for decades of use. New and improved "No Swell" gaskets for use with most solvents and lubricants.

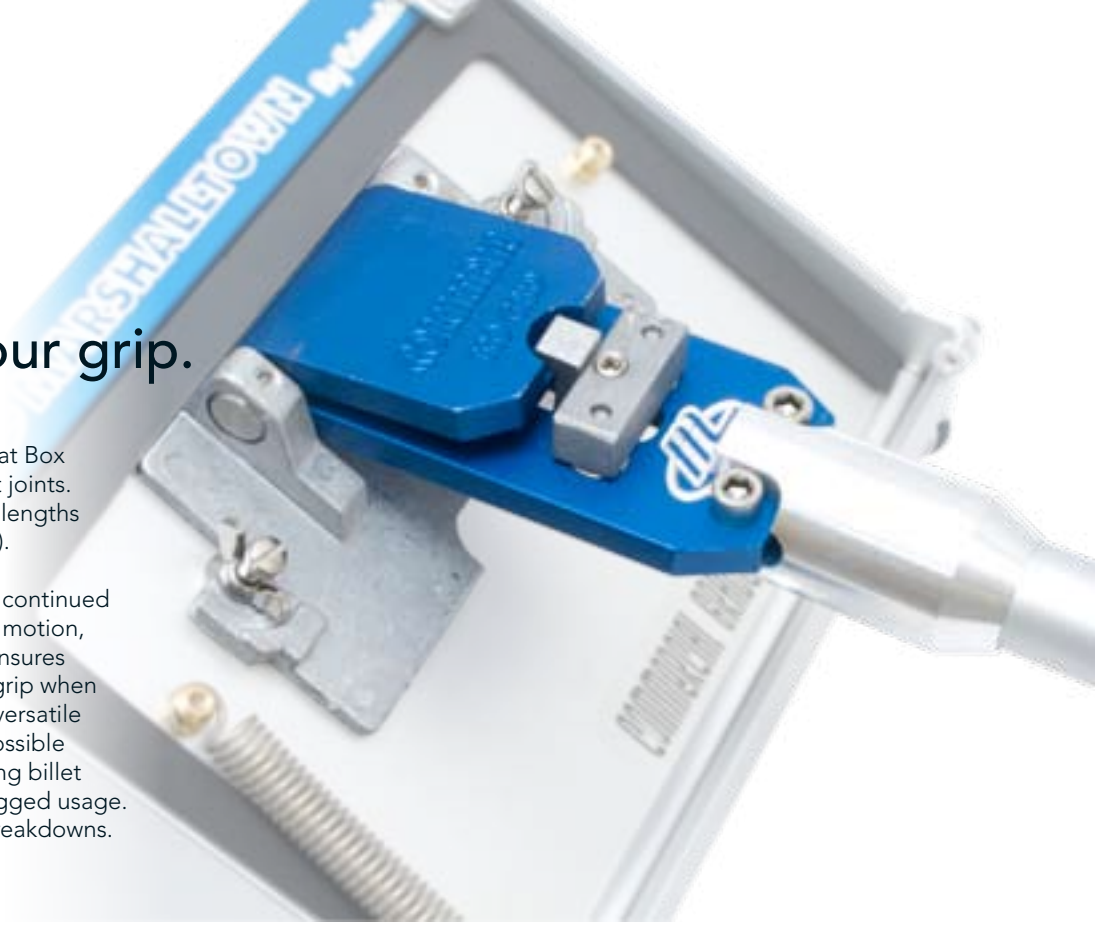

EDI	Part#	Description	Size-in.	Size-mm

Never lose your grip.

Purpose:
Used in combination with any Flat Box to assist in coating flats and butt joints. Available in a multitude of fixed lengths from 3' to 6' (0.9144m - 1.8288m).

The 180° Grip Handle allows for continued braking over the entire range of motion, a complete 180 degrees. This ensures that you never slip or lose your grip when adjusting your position. A very versatile design that provides the best possible braking at any angle. Extra strong billet aluminum design for years of rugged usage. Less moving parts means less breakdowns.

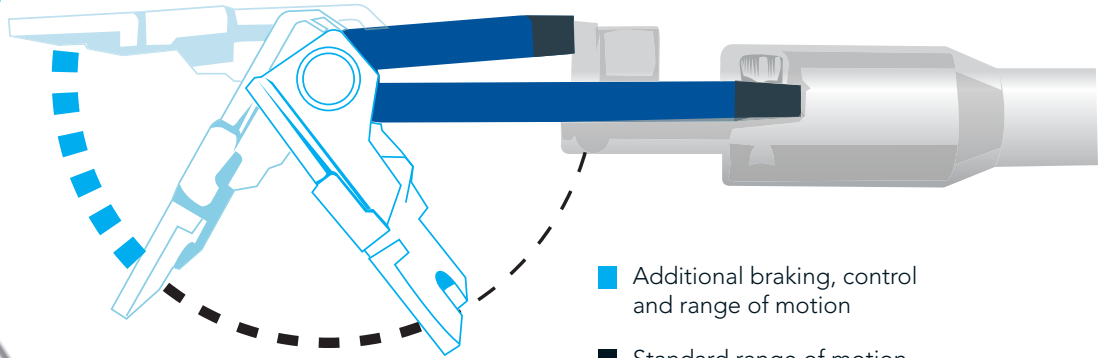

180° GRIP All grip. No slip.

Strong billet aluminum design with blue anodized color, and engraving

Move the adjustable stabilizer ball until you achieve the perfect balance and desired pressure point.

Simple, light, ergonomic brake lever for comfort, and usability.

- Additional braking, control and range of motion
- Standard range of motion

12296	M6BH	6' - 180 Grip Box Handle	72.0	1828.8

HYDRA-REACH 2.0

Extend your reach.

Purpose: Adapts to all Flat Boxes and allows for flat box to be held steady at different angles as it is placed on joint. Used as lever for pushing door on flat box to apply compound to joint. Allows use of tool at multiple lengths.

Hydra-Reach 2.0 Box Handle is capable of lengths extending from 42" (1066.8mm) to 63" (1600.2mm). The Patented hydraulic actuated brake system allows continuous braking throughout extension. The hydraulic system also allows braking with only a minimal amount of pressure on the handle. Weighing in at 2.5 lbs. our Hydra-Reach 2.0 is the lightest extendible flat box handle on the market. Rigid hex tube design limits flex and maximizes energies at all lengths. Precision machining for utmost durability and dependability.

EXTENDIBLE FLAT BOX HANDLE

Hydraulic Power Grip.

US PATENT 11/075,831

The Hydraulic Power Grip is a light touch system that allows you to achieve more pressure with less force. This entirely enclosed hydraulic system is clean and carefree - no mess, nothing to fill. The design features a smaller reservoir that is out of the way, an easier to grip lever, a soft grip for more comfort and our new thumb-click extension mechanism.

VALUE

Pump it up.

Purpose: This tool lives in your mud bucket and loads your automatic taping tools with joint compound.

Marshalltown offers standard and quick clean pumps. Both are built to exacting air-tight standards, making them the easiest pump to prime. They're fabricated with an anodized aluminum cylinder, durable stainless steel shaft, a precision machined cast aluminum head, and a tough, smooth solid aluminum leg. Whether you are using quick-set mud or any other type of joint compound, we have the pump for your bucket. Stainless steel Box filler and gooseneck sold separately.

Features

- Smooth solid leg makes cleaning easy
- 20° angled handle provides enhanced leverage resulting in less back strain.
- Increased gooseneck diameter for faster filling.

EDI	Part#	Description
12279	MMP	Mud Pump
12281	MHMP	Quick Clean Mud Pump
12283	MBF	Box Filler
12284	MGN	Gooseneck

Billet aluminum link will not wear or crack like cast

Soft-grip eliminates tube wear

Solid billet tip lasts a lifetime

Stainless Steel Gooseneck

Stainless Steel Filler

Soft grip handle with billet aluminum ball

20° angled handle for better leverage

Billet anodized leg is sturdy, well balanced, and easier to clean

Maintaining quality.

The same quality that is put into every tool we bring to the market is also found in our replacement kits. Backed by a 5 year warranty and a full line of repair kits Marshalltown is committed to protecting your investment .

THE PREMIER LINE OF TAPING TOOLS

COMMERCIAL GRADE

Industrial Strength Solutions.

Marshalltown by Columbia Taping Tools come with an unconditional warranty of 90 days, except blades and cables, and a limited 5 year warranty from the date of end user purchase against defects in workmanship and materials. Under warranty any defective parts or materials will be replaced at no charge. Our warranties do not apply to damage caused by accidents, abuse, improper maintenance (cleaning), or alterations/adjustments by the user or authorized by the user.

The 5 year warranty is effective from date of customer invoice. It is not transferable. For any warranty claims please have a copy of the invoice for record of purchase date. You will be asked to provide this along with the tool when sending your tool to a service dealer. Please contact your dealer or Marshalltown Company at 1-800-888-0127 for an authorized service center.

Marshalltown is not responsible for any freight damage, delay in servicing/repair, or loss during the time the tool is at a service dealer of manufacturer.
